---

---

2. Underline the verbs in these sentences.

Let's meet some Australian animals that jump, trundle, climb, slither, flap, and snap.

Blind snakes slither across the ground, searching for food.

Koalas use their sharp claws to climb high up into gum trees.

Wombats trundle along on short legs, looking for grass and shrubs to eat. They also eat roots, which they find by digging.

At night, freshwater crocodiles snap their strong jaws and teeth around the fish, insects, frogs, and birds that they eat.
